

Goomba

Information**Ketamine tablet declared as 2C-B****False declaration****Zurich (DIZ)****28.6.22**

Substance details

Ketamine*HCl**6.2 mg**

Details of the substance tested

Thickness

4.9 mm

Length x width

9.7 x 8.7 mm

Weight

245.8 mg

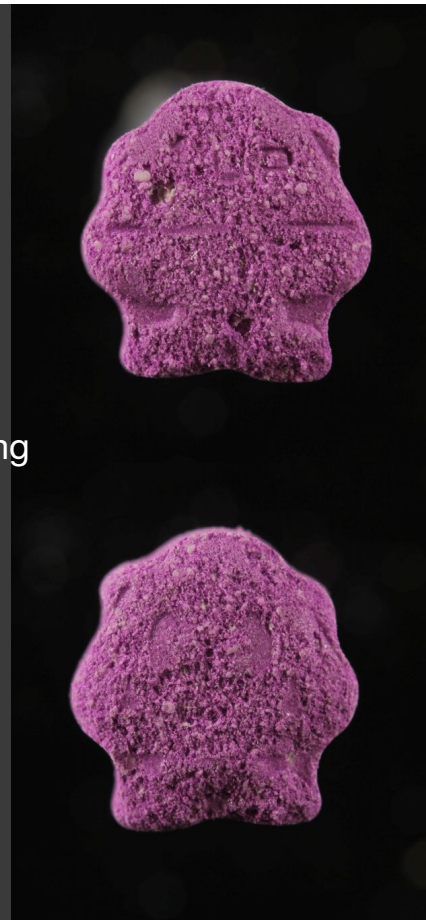

Colour

Purple

Fracture groove

Yes

Relevant substance(s)

**Ketamine 2C-B -
 2C-I**

Risk assessment

This tablet, declared as **2C-B**, does not contain 2C-B but **ketamine**. As there is no 2C-B-typical effect after consumption of this tablet, there is a risk that a higher dose of ketamine will be taken unintentionally. However, due to the small amount of ketamine (6.2 mg), the risk of overdose is considered low.

Alert level

 Information Caution Alerts

Safer Use

Testing

Have your substances tested in a Drug Checking

Testing

If you do not have the possibility to have substances analysed, first test a maximum of one third of the pill, as many high-dose tablets are in circulation.

Wait and see

Wait 2 hours after taking the tablet, as tablets with unexpected active ingredients are often in circulation, which can have a later onset of action.

Drinking

Remember: Drink non-alcoholic drinks (3 dl / hour) and take breaks in the fresh air from time to time to prevent overheating / dehydration.

Disclaimer

If you are in possession of a substance that does not appear on this page, this in no way means that it contains the expected ingredient or that it should be safe. The warnings we publish only refer to the substances listed in our Drug Checking offers, these substances pose a high risk of consumption and should not be consumed. A substance may have the same visual appearance (shape, size, colour, etc.) and yet have different ingredients or a different composition. There is no drug use without risk! Only a complete renunciation of drugs is risk-free! If you still decide to use drugs, you should at least follow the safer use rules.
